1 yum安装

```
1  sudo wget -O /etc/yum.repos.d/jenkins.repo
   https://pkg.jenkins.io/redhat-stable/jenkins.repo
2  sudo rpm --import https://pkg.jenkins.io/redhat-
   stable/jenkins.io.key
3  sudo yum install -y jenkins
4  sudo service jenkins start
5
```

2 修改端口

```
1  sudo vi /etc/sysconfig/jenkins
2  #修改
3  JENKINS_PORT="9090"
```

3 修改/etc/init.d/jenkins中java所在的路径

```
1  sudo vi /etc/init.d/jenkins
2  #修改成 自己jdk目录下的bin/java
3  candidates="
4  /usr/local/jdk8/bin/java
```

如果不修改启动会报找不到/usr/bin/java的错误。

4 启动jenkins服务

```
1  service jenkins start
```
